

Welcome to the most honest, convenient and fastest investment system in the entire world.

❖ LUL is more than just an investment fund; it's a new way of thinking that aims to create positive economic and social change by using innovative approaches and blockchain technology.

That's why we created the Tulban Ideology. Soon, we'll share more details about this idea, but in simple terms, Tulban is a fresh concept that uses blockchain and crypto to transform pyramid and Ponzi schemes into something better. Here's how:

1. It offers high profits and income for people who want to earn money easily.
2. Unlike pyramid and Ponzi schemes, which always fail and lead to fraud, our fund is built to last, ensuring long-term success and steady profits.
3. In a world where technology often makes people feel disconnected, Tulban, like blockchain, brings people together, building trust, teamwork, empathy, and public benefit.

❖ LUL is the first staking and investing crypto fund that is inspired by the blockchain working system. Each person in this system acts like a block approver in the blockchain network. The more referrals you can get, the more profit you will receive, just as the approved block generate future blocks. By using the referral system, you can increase your profit supply chain, make other people benefited and earn multiple times your capital and withdraw it whenever you want. It's a total win-win system, both for you and your referrals.

❖ We have several promotion programs for this fund, for example, when the LUL community reaches the set value, the project's dedicated crypto currency will be introduced, and using the latest marketing and capital management methods (such as increasing demand market, token redemption, token holding and etc). Prices will be always climbing. The end and loyal users of the project will receive a percentage of this crypto currency in the form of airdrops and rewards.

❖ For the first time in the world of crypto, we have introduced the Heir System. If you do not log into your account or remain inactive for 12 months, your assets will be transferred to the heir you have chosen.

❖ As the LUL project development and management team, we can honestly make this promise to our community that we will do our best to provide high profits to the entire LUL community, and in any case, the profit from their investment will be guaranteed. Hoping that we can expand the crypto community and create value and benefit the entire crypto world, especially the LUL community.
